- 10 oranges
- 30g of sugar (optional)
- Ice if you want to drink immediatly

10 oranges

- Peel the oranges, cut them in half, and place them in the Thermomix bowl.
- Put the lid and measuring cup on the bowl. Lock the Thermomix on closed lid position, and pulse twice on the turbo function.
- Strain the juice using a sieve.
- If you want to add sugar: pour the pulp-free juice into the Thermomix bowl, add the sugar, and program for 30 seconds on speed 3.
- If you want to drink it right away, add ice cubes and pulse a few times on the turbo function.
